

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	29 September 2026
Team Members	Mohammedmoinuddin S (Team Lead), Daniel Giftson R, Mizwar Shahul R, Adnan Mustafa A, Akshay Kumar G
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization:

Ideas were generated freely, grouped by theme, and then ranked by importance and feasibility to decide what the micro project delivers first.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Team Member	Role	Responsibility
Mohammedmoinuddin S	Team Lead	Planning, Coalesce setup, review and sign-off
Daniel Giftson R	Member	Spreadsheet preparation and Load Data (import set table)
Mizwar Shahul R	Member	Employee Test table, transform map and field mapping
Adnan Mustafa A	Member	Transform run, validation, re-import and UAT testing
Akshay Kumar G	Member	Reports and Employee Analytics dashboard

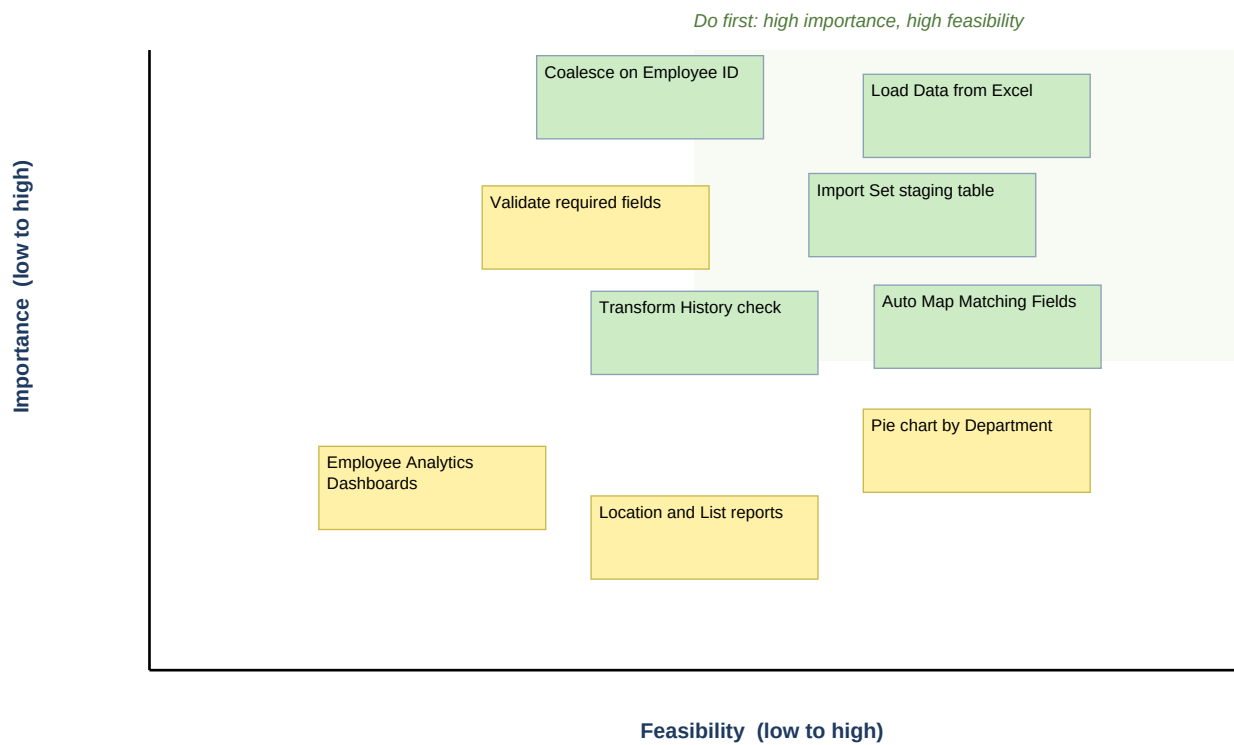

Selected problem statement (PS-1): An administrator needs to bulk-load employee records from an Excel sheet into ServiceNow without manual entry and without creating duplicates.

Step-2: Brainstorm, Idea Listing and Grouping

Each team member listed ideas, which were then grouped into three themes: Data Import, Data Integrity and Insights.

Mohammedmoinuddin S	Daniel Giftson R	Mizwar Shahul R	Adnan Mustafa A	Akshay Kumar G
Plan milestones and sprints	Prepare .xlsx sample sheet	Create Employee Test table	Validate ID, Name, Email	Pie chart by Department
Coalesce on Employee ID	Load Data into staging table	Transform map and Auto Map	Ignore identical re-imports	Location and Employee List reports
Review Transform History	Create Employee Import table	Run Transform and verify	Personalize list columns	Employee Analytics Dashboards

Step-3: Idea Prioritization

Outcome: the highest-value items are Load Data, the staging table and Coalesce on Employee ID (Milestones 1-3); reports and the dashboard extend the project as a final story.
