

Project Design Phase

Problem – Solution Fit Template

Project: Import Data using Transform Maps (Spreadsheet) **Date:** 29 September 2026 **Maximum Marks:** 2 Marks

Purpose / Vision: Make bulk employee data import into ServiceNow fast, accurate and duplicate-free, and give HR instant insight into the data.

1. CUSTOMER SEGMENT(S) [CS] - ServiceNow administrators who onboard or update employee data - HR / operations teams who use the data	6. CUSTOMER CONSTRAINTS [CC] - Data arrives only as an Excel spreadsheet - Works on a PDI / instance with development access - Admin-only access; dashboard form needs ACL Admin Override	5. AVAILABLE SOLUTIONS [AS] - Manual entry record by record: slow, error-prone - Copy-paste into lists: no mapping or duplicate check - Import Sets + Transform Maps: mapped, repeatable, auditable
2. JOBS-TO-BE-DONE / PROBLEMS [J&P] - Move employee data into ServiceNow accurately in bulk - Update existing records without creating duplicates - Show employee data by department and location	9. PROBLEM ROOT CAUSE [RC] - No automated link between spreadsheet columns and table fields - No unique key check on repeat imports - No reports on the imported table	7. BEHAVIOUR [BE] - Prepares the sheet, loads it, maps fields, runs Transform - Checks Transform History and the target list - Re-imports revised sheets over time
3. TRIGGERS [TR] - HR sends a new or revised employee sheet - Need to onboard many employees at once	10. YOUR SOLUTION [SL] - Load the .xlsx into staging table Employee Import (u_employee_import) - Sample Spreadsheet Import transform map to Employee Test (u_employee_test) - Coalesce on Employee ID: update if present, insert if new, ignore if unchanged - Three reports on an Employee Analytics Dashboards dashboard	8. CHANNELS of BEHAVIOUR [CH] 8.1 ONLINE: Load Data, Transform Maps, Transform History, Reports and Dashboards in the ServiceNow UI 8.2 OFFLINE: Preparing and sharing the Excel sheet with HR
4. EMOTIONS: BEFORE / AFTER [EM] - Before: frustrated, worried about errors and duplicates - After: confident, in control, clear view of the data
