

Project Design Phase

Solution Architecture

Date	29 September 2026
Team Members	Mohammedmoinuddin S (Team Lead), Daniel Giftson R, Mizwar Shahul R, Adnan Mustafa A, Akshay Kumar G
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	4 Marks

Solution Architecture:

Solution architecture bridges the gap between the business problem and the technology solution. Its goals are to:

- Find the best technology solution to the problem: reliable bulk import of employee data with no duplicates.
- Describe the structure, characteristics and behaviour of the solution to project stakeholders.
- Define features, development phases (three milestones plus reporting) and solution requirements.
- Provide specifications according to which the solution is defined, managed and delivered.

Solution Architecture Diagram:

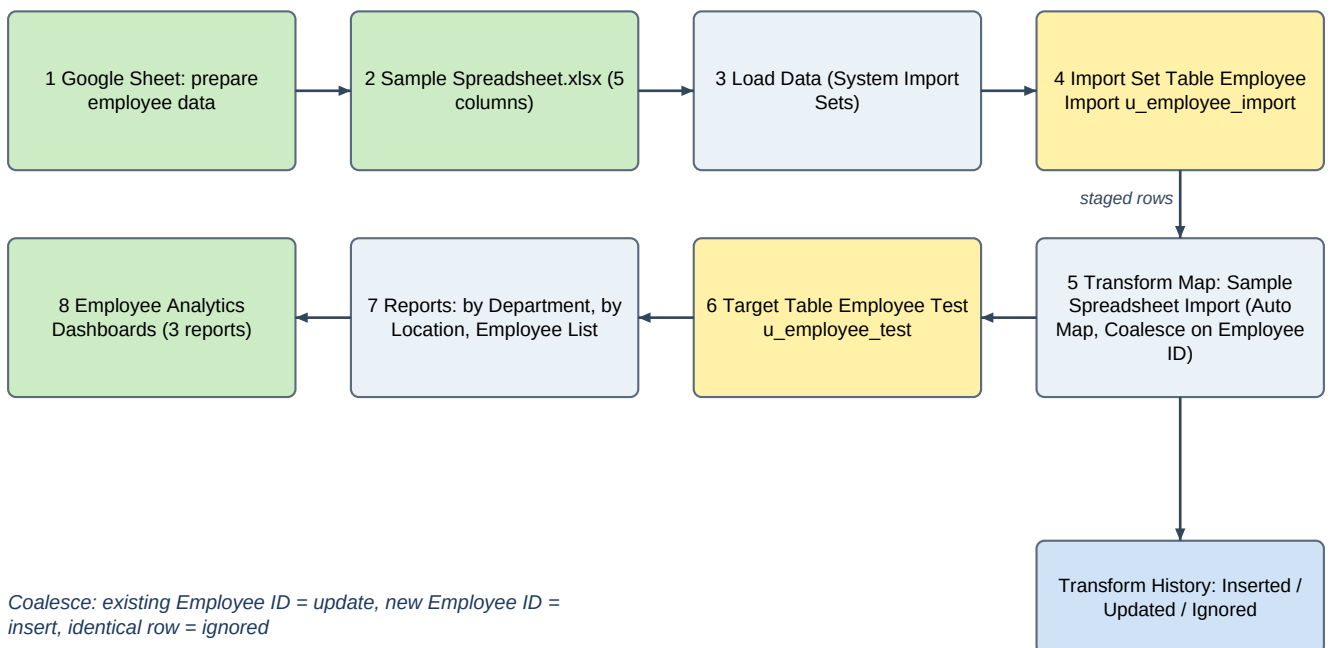

Figure 1: Architecture and data flow of the spreadsheet import solution in ServiceNow

Component summary:

- **Source:** Sample Spreadsheet.xlsx with Employee ID, Employee Name, Email, Department, Location.
- **Staging:** Employee Import (u_employee_import) holds raw uploaded rows before transformation.
- **Transform:** Sample Spreadsheet Import maps source fields to Employee Test; Coalesce on Employee ID.
- **Target:** Employee Test (u_employee_test) stores the final records.
- **Insight:** Reports (by Department, by Location, Employee List) on the Employee Analytics Dashboards dashboard.
